BitTitan
MSPComplete

MSPComplete for FastTrack
Manage migrations with FastTrack and MSPComplete.

Turn FastTrack into an opportunity for you and your customer.

When customers choose FastTrack for migrations, your project timeline and responsibilities change. Before you can start your projects, you need to communicate with the FastTrack team, relay information to your customer, and provide support.

You do this with less control and visibility into how the migration is being handled, while still being responsible for the success of the project. This leaves you handling delays, solving residual problems, and performing additional services before your work can begin.

MSPComplete® makes FastTrack simple and profitable.

Manage FastTrack migrations in MSPComplete for better visibility, planning, and problem-solving. Use updates to better communicate migration status to customers and flexibly respond to changes without depending on the FastTrack team. Once the migration is delivered, fill in any gaps with automated services in MSPComplete without disrupting your schedule.

With licensed users under management, you can immediately deliver value with new services.

With simplified onboarding in MSPComplete, you can confidently offer FastTrack to customers on major projects to make the sale!

Offer FastTrack without losing control or profit on your project.

Visibility
- Track migration progress
- View onboarding status

Profitability
- Sell your contracts at a lower price point
- Lower preparatory services costs

Opportunity
- Easily offer and add additional services
- Qualify for Microsoft incentives
