NEW LICENSE

One license for every collaboration migration.

The MigrationWiz Flex Collaboration License covers SharePoint Sites, Microsoft Teams, Microsoft 365 Group sites, and Google Shared Drives with one flexible license, so you can quote faster, decide where licenses go later, and deliver sites that work on day one. **$50 USD MSRP per 100 GB.**

ONE LICENSE, FOUR WORKLOADS

SharePoint Sites

The whole site collection, subsites and libraries included.

Microsoft Teams

Channels, Posts, Private Channels, and every attached library.

Microsoft 365 Group sites

The group's site and files. With the mailbox? Use the Tenant Migration Bundle.

Google Shared Drives

Folders, files, and permissions, to SharePoint or another Shared Drive.

WHY MSPS CHOOSE FLEX COLLABORATION

FOR MSPS AND IT TEAMS

Quote in minutes, not days

Scope the job from the site count-and-size report in the SharePoint Admin Center. No library-by-library inventory before you can price it.

Decide where licenses go later

Unassigned licenses stay flexible across SharePoint Sites, Teams, Microsoft 365 Group sites, and Google Shared Drives. Once applied to a site, a license stays with it.

Fewer mid-project change orders

Every library attached to a Team is covered automatically, so hidden libraries no longer trigger surprise license top-ups.

Less work for administrators

One project line per site collection instead of one per document library. Large tenants go from dozens of lines to a handful.

Fewer post-migration tickets

Metadata, sensitivity labels, permissions, version history, navigation, and content types arrive intact, so there's no rebuild on the destination.*

One license replaces three

Flex Collaboration replaces the Teams Collaboration, Shared Documents 50 GB, and Shared Documents 100 GB licenses.

Win M&A and divestiture work

Optional site, subsite, and library filters let you carve out exactly what belongs to the divested entity.

Built for Microsoft 365

Designed around SharePoint Online, Teams, and Group sites, with Google Shared Drives too. The same license brings Google Sites, Google Drive, and file servers into SharePoint.

NEW: LABEL-AWARE

Sensitivity labels stay on. Protected content stays protected.

Labels stay on every file, and their encryption is preserved through an optional BitTitan app you choose to authorize. Protected content stays protected.

- Labels stay on every file
- Encryption via an optional BitTitan app
- You choose to authorize

SUPPORTED MIGRATION PATHS

FLEX COLLABORATION

SharePoint Online → SharePoint Online	Google Shared Drive → SharePoint Online	SharePoint Online → Google Shared Drive
Microsoft Teams → Microsoft Teams	Google Shared Drive → Google Shared Drive	File Server shares → SharePoint Online

A SITE THAT WORKS ON ARRIVAL

WHAT MIGRATES

Content fidelity

Every file arrives with its context.

- Item-level managed metadata
- Sensitivity labels and their encryption preserved (via an optional BitTitan app you choose to authorize)
- Created/Modified By and Date preserved
- Custom columns, values, and descriptions
- OneNote notebooks that open as notebooks
- Unlimited version history by default (configurable)

Site structure and security

Nothing to rebuild on the destination.

- Site navigation and content types
- Term store applied to the site
- Permissions, groups, custom permission levels
- Permission changes picked up on re-sync
- Site pages and hub-site associations
- Applied to every subsite in scope

WHERE MIGRATIONWIZ GOES FURTHER

Sizing from the Admin Center

Scoping that lines up with Microsoft's own site-size report, so your quote matches what the customer sees.

Every attached Teams library

Nothing is missed when a Team has more than its default library.

Hub term group properties

Hub sites arrive with their term setup intact.
