NEW IN MIGRATIONWIZ

Migrate complete SharePoint Sites, structure and all.

MigrationWiz now migrates whole SharePoint Online site collections, with their subsites, libraries, structure, and permissions, in a single project, so users pick up right where they left off.

HOW IT WORKS

1 · Size it
Pull the site count-and-size report to see every site in scope.

2 · Discover it
Autodiscovery finds every subsite and library in scope.

3 · Scope it
Move it all, or filter to the sites and libraries you need.

4 · Migrate it
Run passes as needed; permission changes are picked up each time.

NEW: LABEL-AWARE

Sensitivity labels stay on. Protected content stays protected.

Labels stay on every file, and their encryption is preserved through an optional BitTitan app you choose to authorize. Protected content stays protected.

- Labels stay on every file
- Encryption via an optional BitTitan app
- You choose to authorize

WHY IT MATTERS — MIGRATIONWIZ

Whole sites, not library by library
Migrate complete site collections, with every subsite and library, instead of setting up each library separately. Move one site or hundreds in the same project.

A site that works on arrival
Navigation, content types, the term store, and site pages come across with the content, so there's nothing to rebuild on the destination.

Nothing lost along the way
Managed metadata, sensitivity labels, Created and Modified By, and full version history are preserved, not stamped with migration-time values.*

Permissions you can trust
Site permissions, SharePoint groups, and custom permission levels migrate, and changes are picked up on every repeat pass.

Scoped from a report you already have
The SharePoint Admin Center site count-and-size report shows every site and its size. No library-by-library counting.

Migrate exactly what you need
Optional site, subsite, and library filters make mergers, acquisitions, and divestiture carve-outs straightforward.

One license, four workloads
Flex Collaboration licenses SharePoint Sites, Teams, Microsoft 365 Group sites, and Google Shared Drives. Unassigned licenses stay flexible until applied.

Nothing to install
MigrationWiz is 100% SaaS on Microsoft Azure. Migrations run in the cloud, around the clock, with no servers or desktop apps.

WHAT MIGRATES

FULL-FIDELITY SITE MIGRATION

Content fidelity

Every file arrives with its context.

- Item-level managed metadata
- **Sensitivity labels and their encryption preserved (via an optional BitTitan app you choose to authorize)**
- Created/Modified By and Date preserved
- Custom columns, values, and descriptions
- OneNote notebooks that open as notebooks
- All versions by default (configurable limit)

Site structure and security

Nothing to rebuild on the destination.

- Site navigation and content types
- Term store applied to the site
- Site pages
- Permissions, groups, custom permission levels
- Hub-site associations and term properties
- Applied to every subsite in scope

BUILT FOR MSPS AND IT TEAMS

For MSPs

- Quote confidently from the Admin Center report
- Fewer project lines to set up on every job
- Licenses stay flexible until applied
- Filters for M&A and divestiture work

For IT teams

- Budget the move from a report you already have
- Nothing to install or maintain
- Users productive from the first day
- One license for sites, Teams, and Shared Drives

LICENSED WITH FLEX COLLABORATION

NEW LICENSE

$50

USD MSRP per site, per 100 GB

One flexible license for every collaboration workload NEW

One license per site, Team, Group site, or Shared Drive, in 100 GB increments. Unassigned licenses stay flexible; once applied to a site, a license stays with it.

- SharePoint Sites
- Microsoft Teams
- Microsoft 365 Group sites
- Google Shared Drives

SUPPORTED MIGRATION PATHS

- SharePoint Online → SharePoint Online
- Microsoft Teams → Microsoft Teams
- Google Shared Drive → SharePoint Online
- Google Shared Drive → Google Shared Drive
- SharePoint Online → Google Shared Drive
- File Server shares → SharePoint Online
