Understanding M&A Migrations with KIZAN

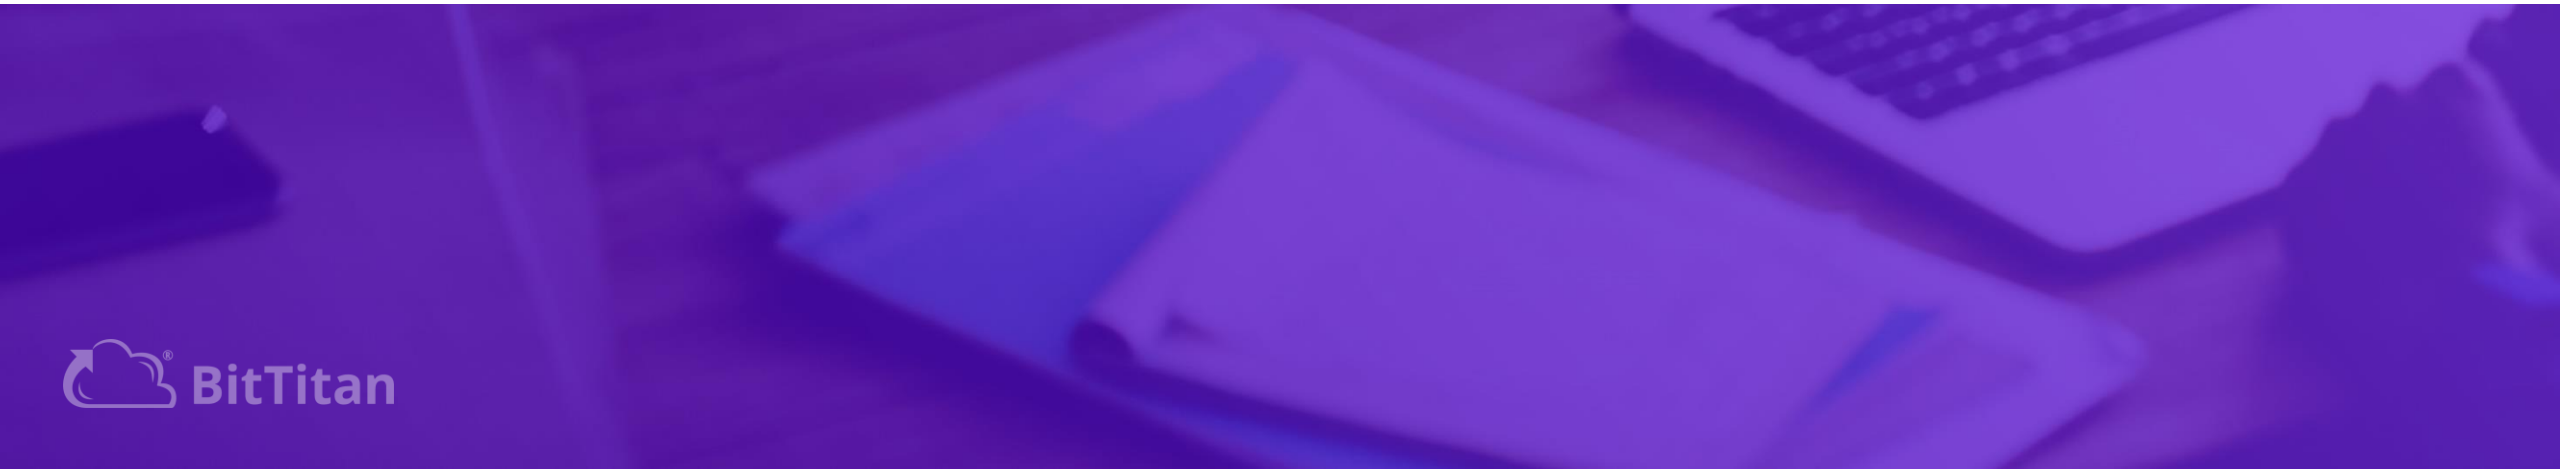

What technical challenges does your team or internal IT face specific to Office 365 tenant migrations?

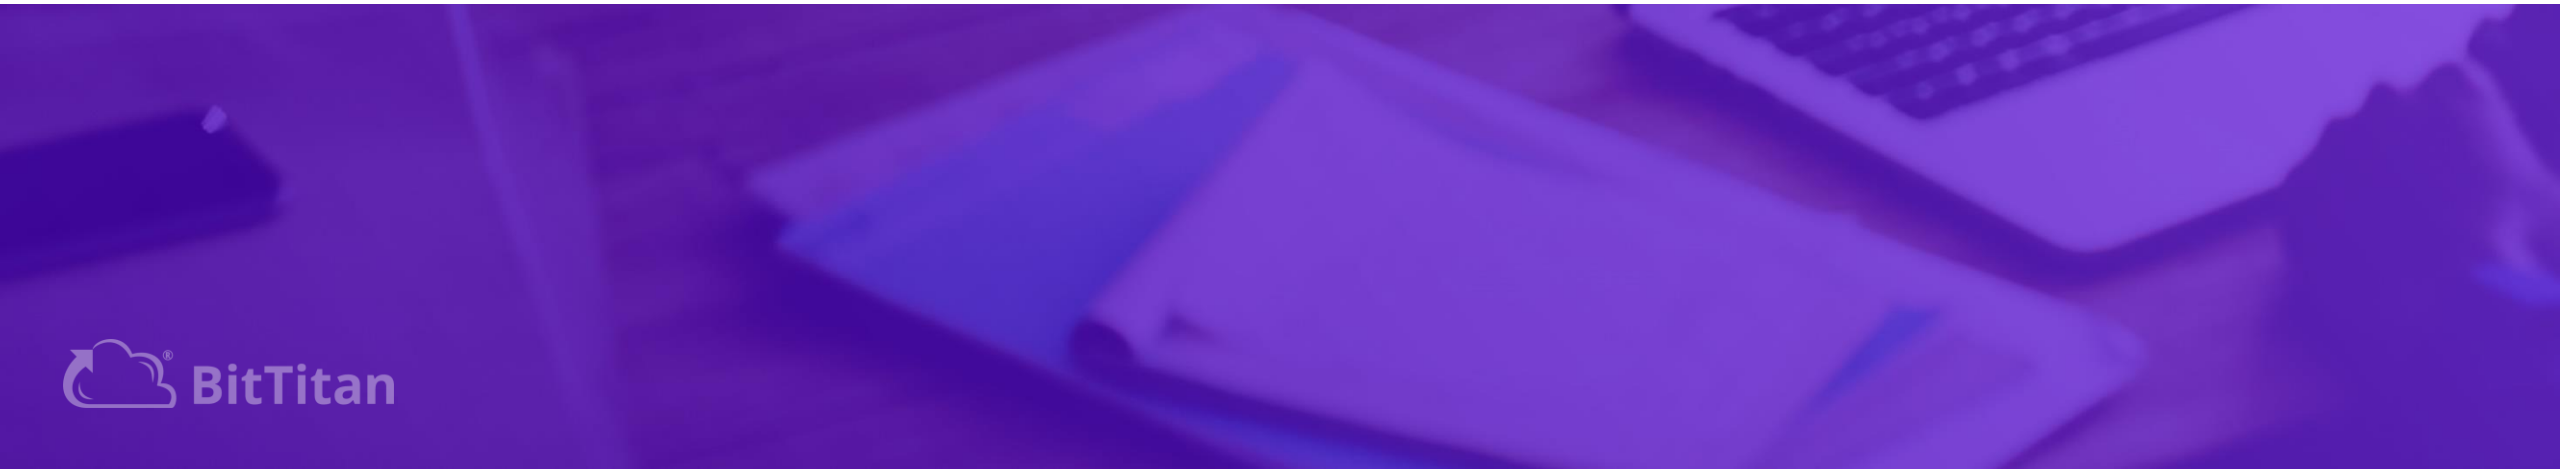

At what point during the M&A process should a partner be pulled in to start planning the migration?

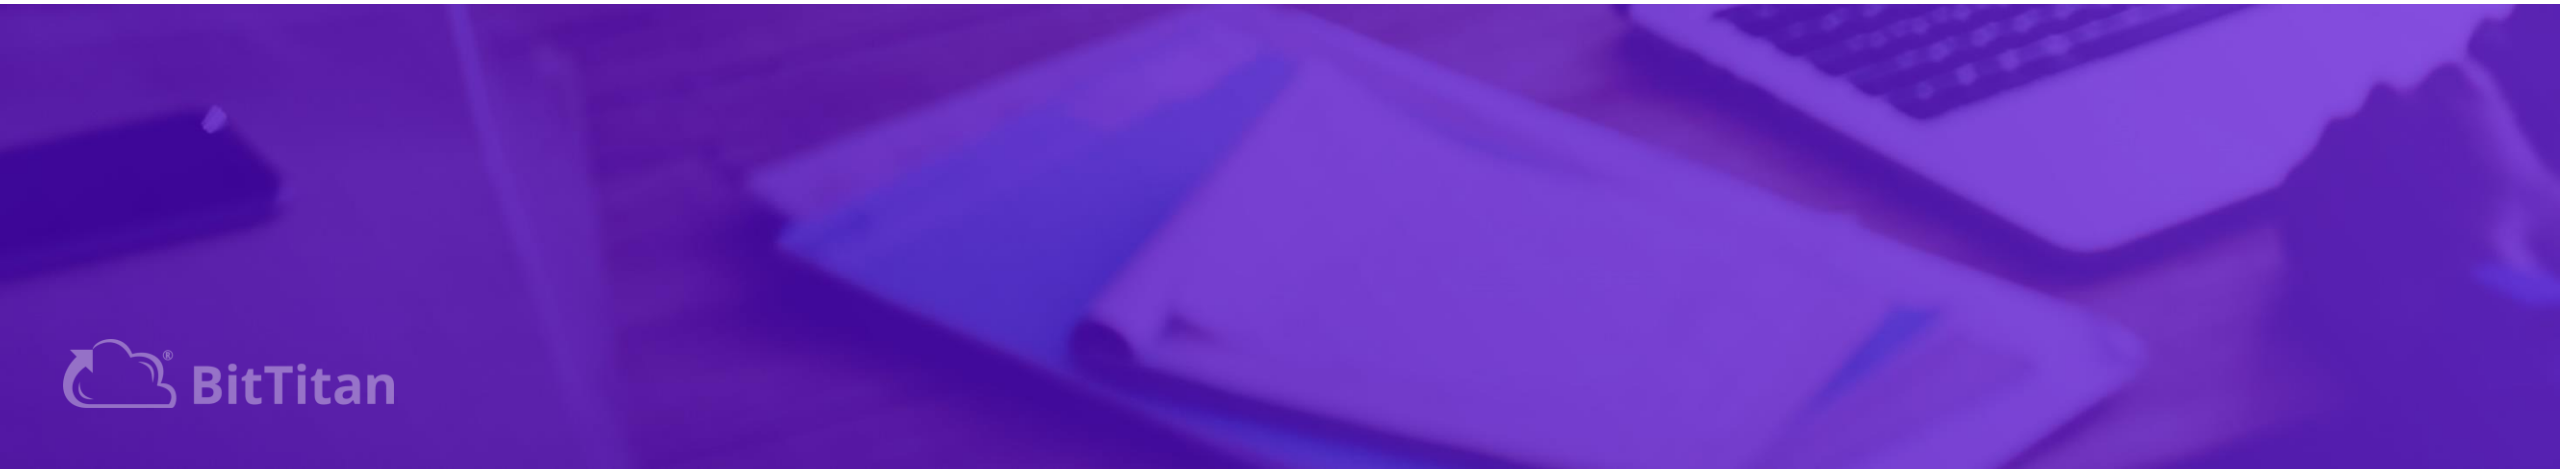

What should be the top goals of IT teams managing a migration after an M&A?

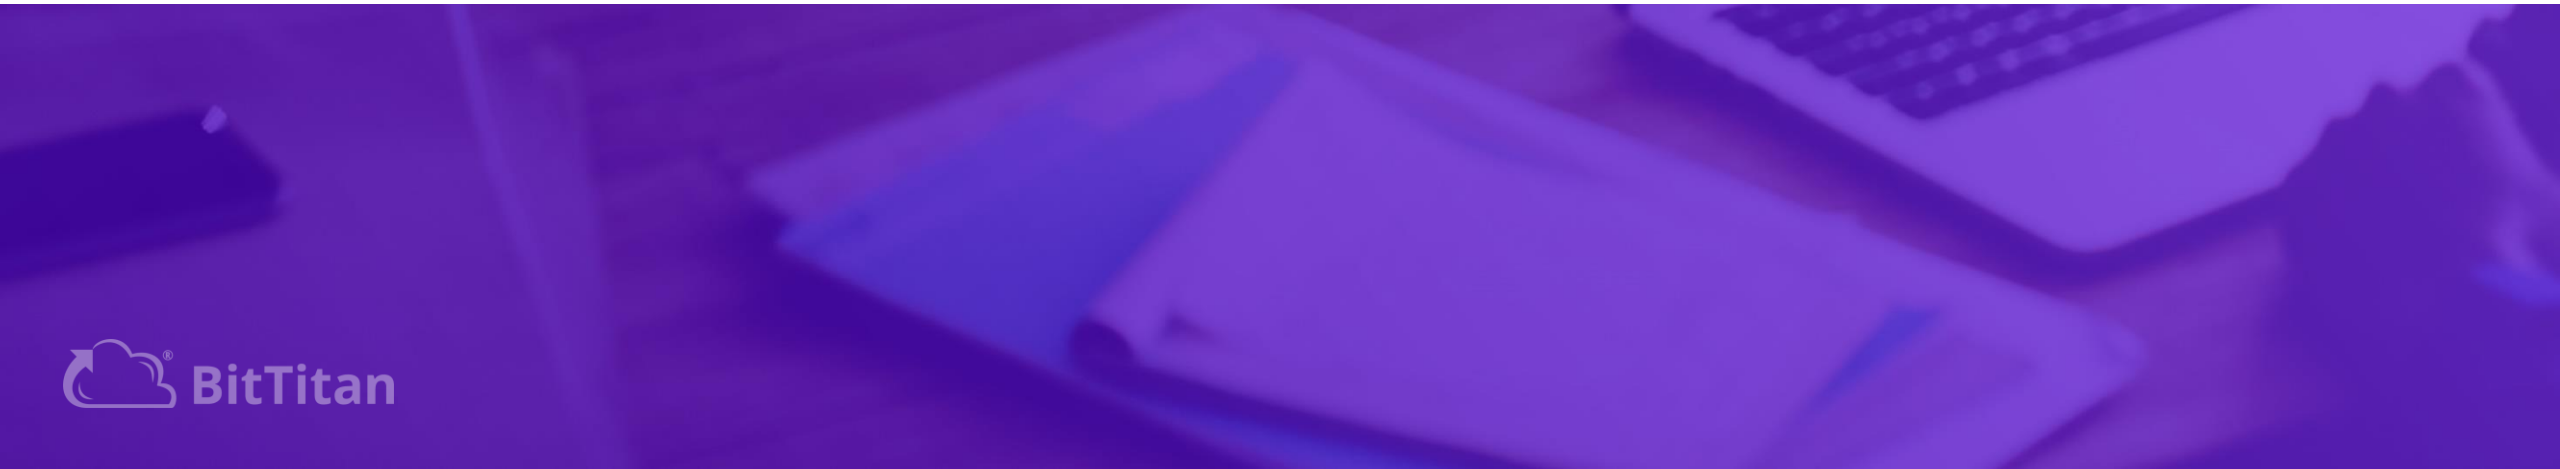

How has KiZAN been able to establish their migration practice with specialty in M&A?

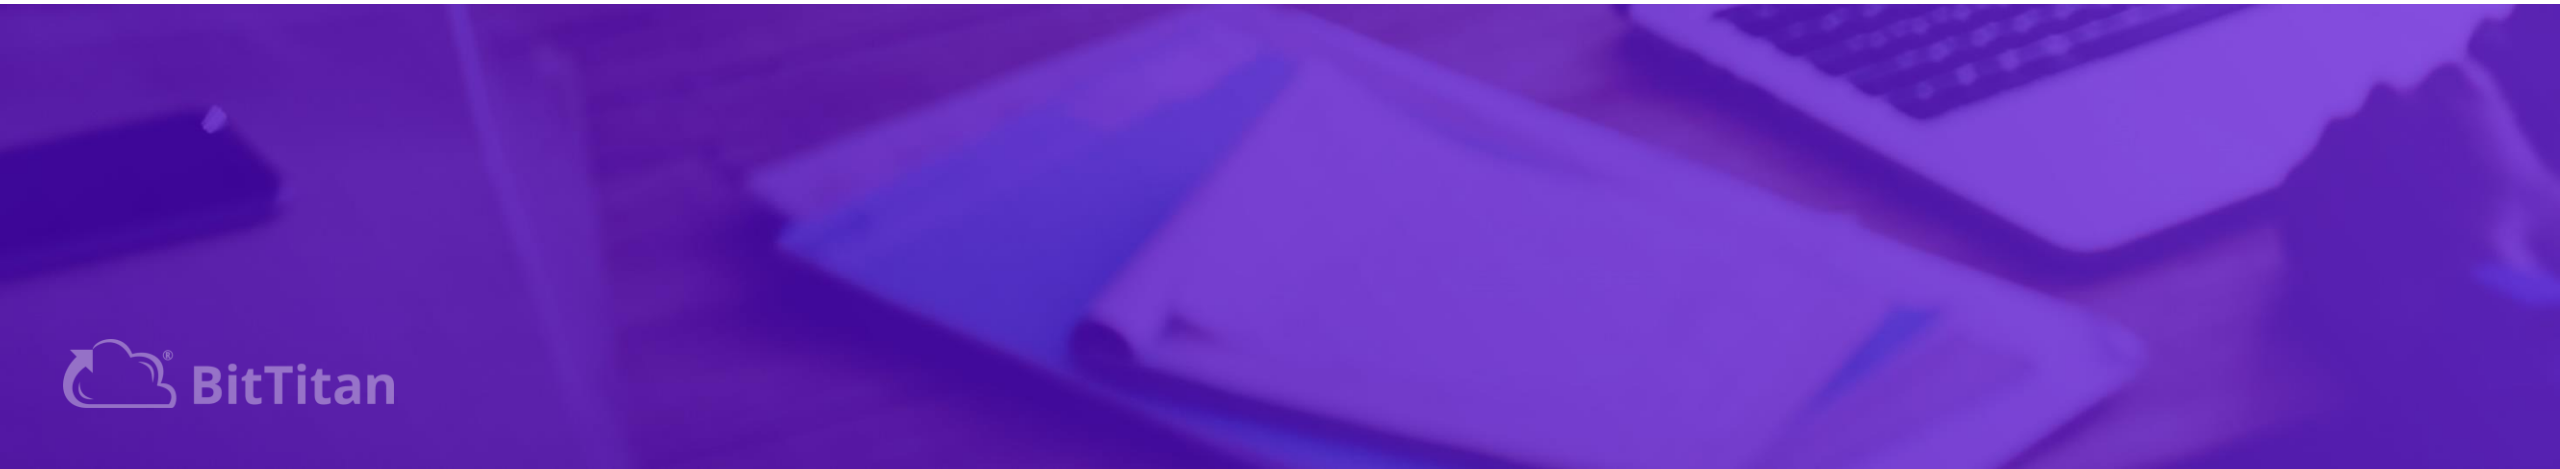

As someone who frequently performs migrations around M&A scenarios, what are the most common pitfalls for partners?

What do you look for in a migration tool?

Understanding BitTitan PowerShell Automation

How does it help the M&A process?

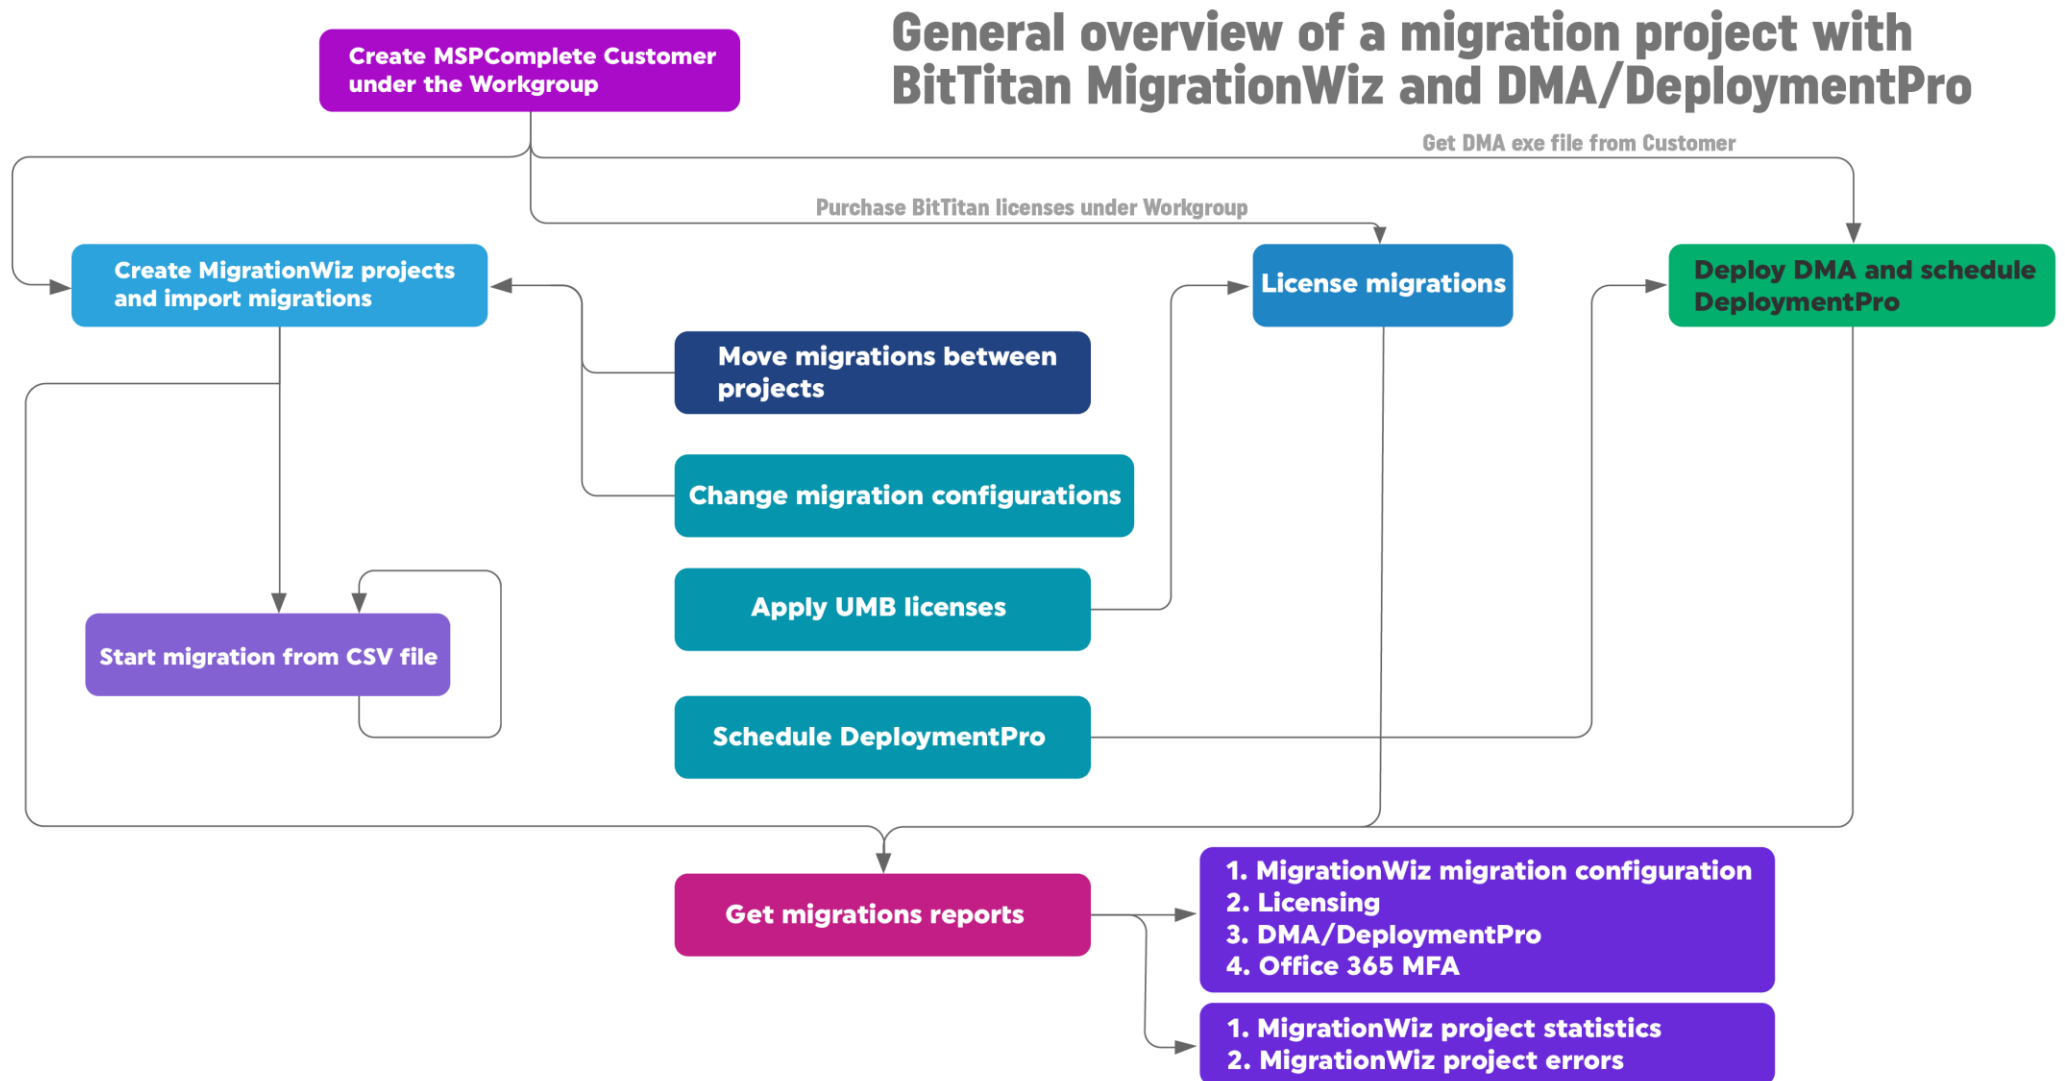

Why PowerShell Automation?

BitTitan PowerShell Benefits

- Automate repetitive tasks
- Saves work hours
- Provides consistency
 - Tasks executed in the right order
 - No risks of typos or forgetting someone
 - No risk of performing a task incorrectly

Migration Tasks

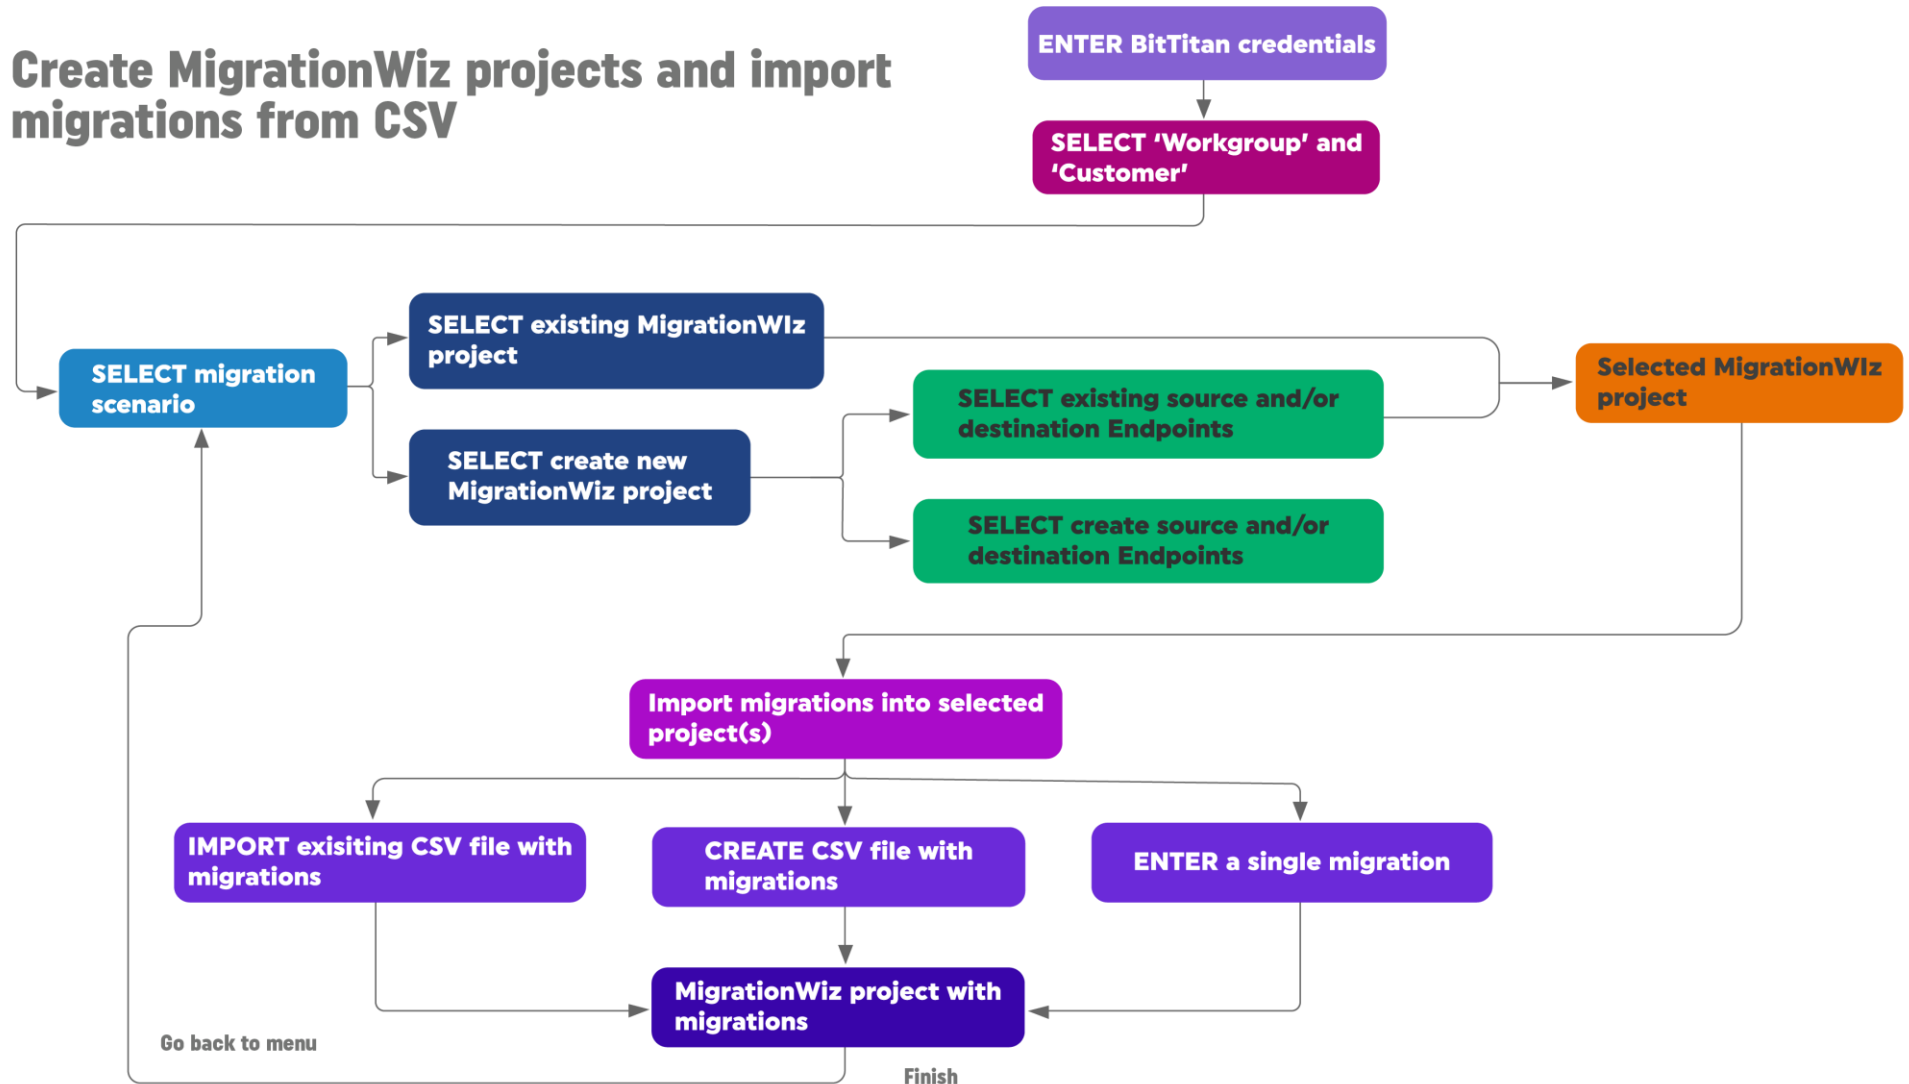

The many tasks involved in a migration project

What tasks can you perform?

Create-MW_Projects-Import-MW_Migrations_From_CSVFile.ps1

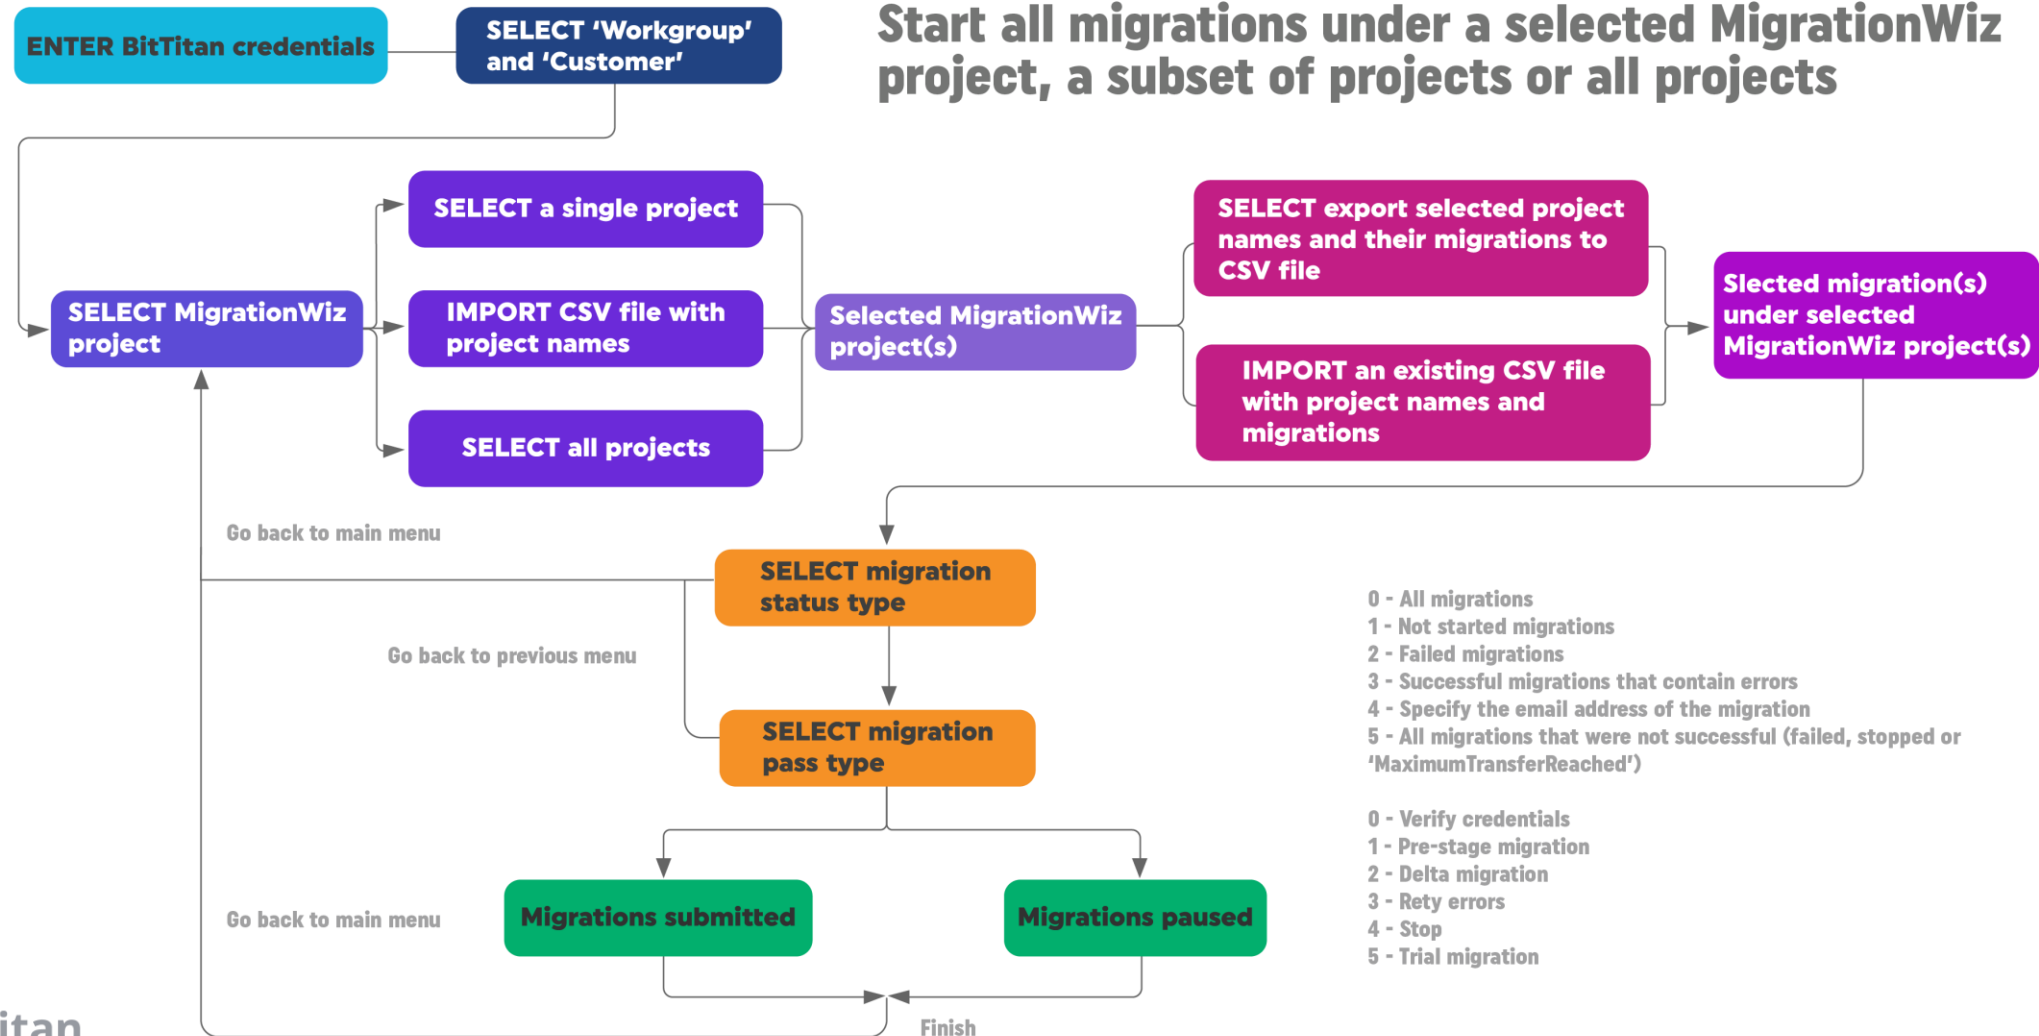

Create MigrationWiz projects and import migrations from CSV

Tasks Continued

Start-MW_Migrations_From_CSVFile.ps1

Start all migrations under a selected MigrationWiz project, a subset of projects or all projects

Next Steps
