

# Move Microsoft Teams to a New Tenant with MigrationWiz

Migrate Teams, Channels, Conversations, Permissions, and Files with the industry's leading cloud migration solution.

With Microsoft Teams adoption on the rise, tenant-to-tenant migration projects have a new workload requirement. MigrationWiz now supports the lift 'n' shift of a Teams instance to a new Office 365 tenant, including the migration of User Permissions, Files, Channels, and Conversations. Configure and launch projects from the same easy-to-use interface for all your other migration needs.

## Assess your Teams instance

Through BitTitan's new Teams assessment tool, gather important information about your instance such as total number of Users, Teams, and amount of data. Understand required licensing and timeline to complete this project.

## Skip the Installations

Just like our other workloads, MigrationWiz is 100% SaaS and requires no on-premises installations or professional service packages to start a project. Configure your endpoints, run your assessment, and off you go.

## Preserve Conversation History

MigrationWiz works around Teams API limitations to grab important customer IP and rehydrate Conversations on the Destination to adhere to audit best practices.
